

ImagePerfect™ SafeTouch

The clear choice
for surface protection

Highly effective
antimicrobial agent

Fully resistant to heavy-duty
and abrasive cleaning

Antimicrobial performance
for 3 years

**SURFACE
DECOR Co**

▲ Added protection for tables, desks and counters

▼ Makes screens, doors and panels safer to touch

ImagePerfect™ SafeTouch is an 80 micron self-adhesive clear laminate, fully resistant to heavy-duty and abrasive cleaning, with the added benefit of antimicrobial properties to minimise the spread of bacteria and human coronavirus.

The film incorporates the highly effective antimicrobial agent zinc pyrithione, which inhibits the growth of micro-organisms such as bacteria, fungi and parasites on the surface. The active agent works by depriving microbes of the conditions they need to survive and spread. The film delivers over 99.99% proven protection against growth of specific microbes for 3 years. ImagePerfect SafeTouch also demonstrates an antiviral activity of 74.3% on human coronavirus HCoV-229E after a contact time of 24 hours.

The ultra-effective antimicrobial agent is encapsulated within the structure of the film, rather than being applied as a coating. This preserves the protective properties against regular abrasive cleaning, delivering stable, long-lasting performance. Thorough independent tests show that ImagePerfect SafeTouch is fully resistant to frequent cleaning with solvents such as 70.0% ethanol, 0.1% IPA and 5.0% benzalkonium chloride.

In addition, it offers superior removability with clean-peel properties and no adhesive transfer. This allows the surface to be easily restored to its original state after film removal.

▲ Can be applied directly over printed graphics

The film is available in gloss and matt finishes allowing customers to combine performance with aesthetic requirements.

Applications

ImagePerfect SafeTouch can be applied directly to a wide variety of surfaces such as wood and glass. Its high level of transparency allows the natural aesthetic of the original surface to be retained.

The film is ideal for application onto a wide variety of flat objects, including doors, desks, tables, counters, cupboards, shelves, windows and panels. Some examples of various environments where the product can be used:

Retail	Shopping centres, supermarkets, shops
Healthcare	Hospitals, clinics, doctors' surgeries
Education	Nurseries, schools, universities
Public transport	Taxis, buses, trains
Hospitality	Hotels, restaurants, cafes, bars, gyms, cinemas
Events	Exhibition centres, conference facilities, meeting rooms

The Features

Incorporates highly effective antimicrobial agent - zinc pyrithione

Antimicrobial agents encapsulated in the structure of the film

Solvent adhesive

80 micron

Independently tested

Thorough antimicrobial tests

Transparent film

Gloss and matt finishes

Clean-peel with no adhesive residue

The Benefits

Delivers over 99.99% proven protection against the growth of a range of common bacteria, fungi and parasites and demonstrates an antiviral activity of 74.3% on human coronavirus HCoV-229E after a contact time of 24 hours

Product's protective properties are preserved even with regular abrasive cleaning, delivering protection for 3 years

Provides an additional hostile environment to microbes around joints and film edges

Robust film which is easy to handle during application

Offers peace of mind

Proves the film is fully resistant to frequent cleaning

The natural aesthetic of the original surface is retained and can be applied over printed graphics

Offers maximum aesthetic choice for customers

Surface is easily restored to its original state after film removal

▼ Fully resistant to spillages and frequent cleaning

Antimicrobial Properties

In accordance with ISO 22196, the antimicrobial property of ImagePerfect SafeTouch has been proven to offer high levels of efficacy (over 99.99%) against a number of different types of bacteria*, including:

Escherichia Coli (E. Coli)
Staphylococcus Aureus (Golden Staph)
Methicillin-resistant Staphylococcus Aureus (MRSA)
Salmonella
Listeria
Klebsiella Pneumoniae (K. Pneumoniae)
Enterococcus Faecalis (E. Faecalis)
Pseudomonas Aeruginosa
Legionella Pneumophila

In accordance with ISO 21702, ImagePerfect SafeTouch demonstrates an antiviral activity of 74.3% (1.3 log₁₀ TCID₅₀) on human coronavirus HCoV-229E after a contact time of 24 hours at 25°C with a relative humidity ≥ 90%.

*At the time this document was created, the list of tested bacteria was as above. Tests on other microbes are continuously being performed. To see the latest list please visit our website.

Specifications

Adhesive	Solvent based semi-permanent
Adhesive strength	10N / 25mm (Finat TM 1/24h)
Release paper	2 side PE-coated silicone paper, 140g/m ²
Temperature range	-30°C to +90°C
Flame retardancy	EN13501 – 1:2018, classification: B-s1, d0

Disclaimer: ImagePerfect SafeTouch has been tested by an independent laboratory, Spandex, Berger Textiles, our distributors, and any associated or related parties assume no liability for the accuracy of these tests. While we believe these test results are reliable, they do not in any way constitute a warranty or guarantee of performance for any application. All material should be fully tested by the purchaser to determine the suitability of performance for your specific application. The user is responsible for ensuring the product is marketed and used in compliance with any applicable laws and any documentation provided by the manufacturer.

Application Features

- ✓ Apply to a variety of surfaces including wood, glass, stainless steel, aluminium, rigid PVC, acrylic sheets and touch screens
- ✓ High transparency means that the natural aesthetic of the original surface is maintained
- ✓ Can be used as a laminate on printed films
- ✓ Available in gloss and matt finishes

Antimicrobial Testing

Thorough tests prove that the antimicrobial performance of ImagePerfect SafeTouch withstands prolonged and repeated surface cleaning using harsh solvents such as 70.0% ethanol, 0.1% IPA and 5.0% benzalkonium chloride. All tests were performed independently** offering peace of mind.

**ImagePerfect SafeTouch has been independently tested by 3A Laboratori (accredited UNI CEI EN ISO/IEC 17025, and certified UNI EN ISO 9001)

Look for the sign!

ImagePerfect SafeTouch comes with a sticker to give your customers extra confidence that the film is in use.
